

# Home laundry solutions

Welcome to the new generation of Bosch washing machines, washer dryers and tumble dryers incorporating our new and unique design philosophy – Maxx Freedom Performance – designed to give you maximum freedom and maximum performance.

With Bosch you do not have to think about the technology. We have taken care of it so you can be confident that each and every time you use your Bosch washer or dryer you will get outstanding performance.

At Bosch our aim is to take the chore out of laundry. We will give you the best results and save you time, so you have the freedom to get on with the more exciting things in life.

How have we achieved this? Simply by identifying your needs and ensuring our machines satisfy these efficiently. Bosch programmes and features are specifically designed to make your day easier, to free up your precious time while taking complete care of your laundry whether it's cotton, silk or wool. So you can be confident that this is one chore you no longer have to concern yourself with.

To help you choose the right Bosch washing machine or tumble dryer we have divided our appliances into three groups:

		
Bosch <i>Logixx</i> ●●●●● Premium models with exceptional cutting-edge features and extras	Bosch <i>Exxcel</i> ●●●●○ Mid-range appliances with a broad range of extra features and benefits	Bosch <i>Classixx</i> ●●●○ Simple practical models offering Bosch build quality and value for money

Maxx<sup>TM</sup> freedom performance

# Complete laundry solutions

At Bosch, we're working harder to make your life easier by offering the complete laundry solution

**It's all stacking up**

If space is limited our handy stacking kit offers the perfect solution. All our fullsize washing machines and most of our tumble dryers can be stacked using this. There's even a pull out tray that can be used for the linen basket for easy loading/unloading, all living up to the Bosch 'solutions' philosophy where we aim to make your chores that little bit easier. Special accessory WTZ1180.

**Irons**

Research shows that ironing is one of the most hated domestic chores there is, so here at Bosch we are constantly looking at ways to make the job easier. Our new range of power steam irons combine all the best features of a steam generator and top of the range steam iron into a single hand-held unit. Their new injection pump system helps to steam through the ironing pile even more quickly and efficiently. In addition the fresh new colours help to banish those washday blues. - See page 40 for a more detailed look at our iron range.

**Who better than Bosch to offer the complete laundry solution**  
Laundry isn't just about throwing a few clothes into a washing machine, it can be much more of a chore than that. The task from start to finish includes washing, drying, ironing and putting away. As the laundry experts we are the only manufacturer in the U.K. capable of offering a complete laundry solution, by producing all the domestic appliances involved in this process - washing machines, washer dryers, tumble dryers and irons. For this reason we feel we completely understand the laundry process and your needs within this process. Our appliances help get the chores out of the way with maximum efficiency, leaving you time to focus on the big picture.

Bosch takes the chore out of laundry by giving you the best wash performance every time. Choose from a range of Classixx, Exxcel or Logixx models to suit your needs and budget.

## Free time

### Express Wash system

Clothes tend to be less soiled nowadays, the Express Wash system reduces wash programme times by 30-40%, ideal for medium/lightly soiled clothes. For example, the Easycare 40°C programme is just 47 minutes.

### Remaining time indicator

This lets you know when your laundry will be ready by showing the remaining time in minutes.

### Porthole door

Bosch's porthole door is more generous than most other washing machine doors making it much easier for you to load and unload bulky items like quilt covers and towels without excessive creasing. And because the door has an opening angle of 180°, it opens flat against the machine, so it's never in the way.

### Silk handwash

An especially caring programme with gentle wash action. Intermediate spinning in the rinse cycle is omitted. A gentle final spin at 600 rpm completes this delicate programme.

### Rinse plus

When selected the machine will perform an additional rinse cycle to remove any detergent residues from delicate fabrics – ideal where a member of the family has particularly sensitive skin.

## Easy day

### 3D AquaSpa wash system

A wash and shower system for optimum washing results. Water enters the drum from three sides for quick and effective distribution. During the cycle specially designed paddles scoop up the water gently bathing the wash load, ensuring gentle washing and optimum usage of the water in the drum.

### Cold fill

Your machine will take in cold water and heat up just what it needs. These days most programmes are 40°C and detergents are now designed to start working at lower temperatures. Machines which work with ready-heated water actually miss out on some of the cleaning process due to this change in detergent design. Cold fill saves energy while delivering first-class performance.

### A+ energy efficiency

All our washing machines except two have an A+ energy rating, meaning they use over 10% less energy than other A-rated products.

## Complete fabricare

### Aqua plus

Aqua plus achieves the same benefit as Rinse plus of removing detergent residues but works within the normal wash and rinse cycle of the chosen programme and with all types of fabrics. If Aqua plus is selected, a higher water is used throughout the wash and rinse cycles. This feature is available on model WFO 2867 only.

### Variable spin selection

All wash programmes feature an automatic spin phase appropriate to the wash type. The Classixx variable spin selector with 4 settings allows you to reduce the spin speed for more delicate items and a "rinse and hold" option.

### Reduced ironing on all models

This option is available on all models. It spins the laundry at intervals, gently tumbling the load during the spinning cycle. At the end of the spin phase a gentle rotating action keeps laundry free and fluffy. The result is reduced creasing, easier ironing – and an easier day for you.

### Handwash wool

An exceptionally gentle woollens handwash programme, which runs at only 27 rpm (usual speed 50 rpm) with a soft wash action and special spin phase that ensures that everything stays in good shape.

### 15 programme options

15 carefully designed "Clothes Care" programmes and a wide choice of options deliver complete fabricare whatever the wash.

## Sure clean

### Wash Plus system

The Wash Plus system brings the equivalent of an A-class wash performance to a wider range of temperatures than ever before. Unlike most washing machines on the market, Bosch machines now deliver the equivalent of an A-class performance not only at 60°C but at 40°C and 90°C as well.

### Freshen up

This handy feature gives clothing the lightest of washes without using any detergent – particularly useful for freshening up stored clothes or eliminating the smell of cigarette smoke from lightly worn clothes. It cuts down on the wear and tear of clothes, takes only 20 minutes and reduces energy use.

Washing machine  
WFL 2067

Classixx 1000 ●●○○○

Capacity **6kg / 13lbs**  
Spin speed **1000-600**  
Consumption rates **60°C cold fill**

- Very quiet noise level
- Cold fill

Sure Clean

**3D AquaSpa wash system**  
A wash and shower system for optimum washing results. Water enters the drum from three sides for quick and effective distribution. During the cycle specially designed paddles scoop up the water gently bathing the wash load, ensuring gentle washing and optimum usage of the water in the drum.

Free Time

**Time delay**  
This option allows you to programme your washing machine to start between 1 and 19 hours after you set it. So you can time your washing to be ready for when you get home and it won't have been lying damp in the machine all day. It also allows you to make use of cheaper late-night electricity rates.

Easy Day

**Mixed load programme**  
A fast wash for loads where mixed fabrics can be washed safely at 30 degrees in just 35 minutes. Capable of washing a load up to 3kg, it is ideal for loads that might be urgently required before a full load has been collected.

Cascade system

On Exxxcel and Logixx models, a fourth dimension is added through the cascade system, where water enters the drum from above giving even faster water penetration. The cascade system is also activated during the rinse cycles for more thorough and effective rinsing.

LC display

All our Exxxcel washing machines feature a large LC display showing you the wash progress via simple symbols, time remaining and the spin speed. The over dosage indicator takes the guess work out of detergent dosage; saving on detergent and water wastage which is better for you and the environment. There is also a child lock to stop little fingers from causing havoc.

Reduced ironing option

This option spins the laundry at intervals, gently tumbling the load during the spinning cycle. At the end of the spin phase a gentle rotating action keeps laundry free and fluffy. The result is reduced creasing, easier ironing – and an easier day for you.

Fabricare programme

This is a gentle programme offering a low temperature wash that takes just 43 minutes. This is a gentle yet thorough wash, which has been developed especially for today's 'fashion fabrics'.

Not every feature detailed on these pages are available on every product in this brochure. Please refer to individual product pages and product information tables for precise specifications.

Free time

**LC Display**  
Our Logixx range really does speak your language. The liquid crystal display keeps you constantly updated on the progress of the wash. It lets you know which wash cycle you have chosen, when it's adding detergent, where it is in the programme

cycle, how much time is remaining and even when to remove your washing.

**New drum**  
Our Logixx washing machines feature a revolutionary 'ripple effect' drum for more efficient water extraction, which saves on drying time and ultimately makes your life that little bit easier.

**9kg capacity**  
The new Logixx 9 has an extra big drum offering the flexibility to load from 1 – 9kg. With the largest porthole opening of any domestic washing machine it means you can wash big items such as rugs, blankets and duvets.

**Pause option**  
We've all done it – left a sock on the stairs, then realised it's too late because the wash cycle's started. Or perhaps you've put a red garment into a white wash by mistake. With our Logixx machines, the problem's solved. The pause option allows you to open the door early in the cycle to add or remove items.

**Programme end time selection / Time delay**  
This option allows you to set the time you want your washing to be ready (in 30 minute segments), so that it doesn't lie damp in the machine for hours. It can be programmed to start up to 24 hours after being set. To make things even easier the time remaining is displayed in real time.

Sure clean

**Sensor electronics**  
At every stage of the wash cycle sensors monitor and adjust performance. The revolutionary Hydrosensor II has two infra-red beams which monitor soiling during rinsing by assessing how cloudy the water is. Rinse length and number of rinses is then adjusted accordingly.

**Ultra-reliable whisper-quiet motor**  
The WFR 3269's standard-setting asynchronous motor delivers triple-A wash, spin and energy performance. The innovative motor has been developed for greater efficiency, durability and reliability. Its ultra low-vibration operation makes for Bosch's quietest ever washing machine.

Not every feature detailed on this page is available on every product in this brochure. Please refer to individual product pages and product information tables for precise specifications.

# A new dimension in washing – *Logixx 9*

So whether you are washing a large load, a bulky item, or even a delicate item your clothes are given the best care throughout the wash cycle.

**Packed with programme options**

But large loads aren't the Logixx 9's only forte. Bosch's commitment to complete fabricare remains as important as within our other machines. A gentle wool programme and hand wash silk programme will deliver results better than hand washing – so this is a real gentle giant.

Plus the additional space in the drum in combination with the Reduced Ironing option leaves your laundry less creased and therefore easier and quicker to iron.

In fact Logixx 9 is so versatile it will banish any washday blues. Mixed loads of up to 4kg can be washed in just 35 minutes making this a faster machine than its looks might deceive.

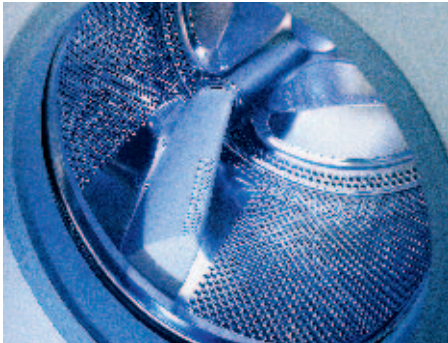

There is even a pause option just in case you need to add something to the wash once the machine has started.

Logixx 9 brings a new dimension to your washing demands and solves them all within its stride. Whether it is a daily wash, a weekly wash or even the school football team kit, Logixx 9 will handle it without a fuss.

**Washing Machine**  
**WBB 24759**

*Logixx 9*

Capacity **9kg/19lbs**  
Spin speed **1200-400**  
Consumption rates  
**60°C Cottons with intensive wash**  
Time **150 mins**  
Energy **1.7kWh**  
Water **69 litres**

The new Logixx 9 with its large door opening and huge drum takes laundry to a new dimension. This colossus of a machine can swallow a staggering 9kg of washing and still deliver a wash quality that is second to none.

The numerous benefits this machine can bring to you and your family are endless and the Bosch technicians have made sure that the technology is there to deliver these with a wash system unique to this machine.

The Logixx 9 boasts a drum size almost 70% larger than any standard machine and with the massive door opening offers easy loading and unloading like never before.

Large items, such as bulky double duvets or curtains, which previously would have to be taken to the launderette, are all taken in the Logixx 9 with ease.

**The unique 3 dimensional wash system**

So how have Bosch achieved all this. Quite simply by the revolutionary drum and paddles. Following the principle of Archimedes screw the inclined drum, in combination with the archimedic paddles, push the washing forward as well as around the drum. These specially designed paddles then help to saturate the wash load continually during the wash process ensuring that your laundry is perfectly agitated and washed at the same time.

- Reduced ironing option
- Child lock

**Performance solutions**

- 15 'Clothes Care' Programmes
- Handwash Wool (with cradle action)
- Delicates silk programme
- Freshen up programme
- Mixed Load programme (4Kg) at 30 degrees
- Variable spin selection (100 rpm) with rinse hold
- Options: Rinse Plus/Reduced Ironing/Intensive/Normal/Quick
- Additional Programmes – multi programme Prewash

A pedestal is also available as an optional accessory (WTZ 1210US), raising the height of the machine and acts as a drawer.

**Other Features**

The keylock alarm locks the machine, preventing your selections being inadvertently changed during the programme and the door remains locked at the end.

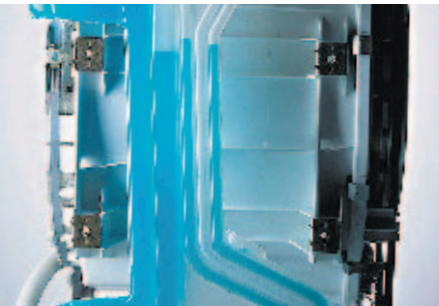

The audible alarm indicates the start or end of the programme and any operating errors or malfunctions.

**Economical with perfect results**  
The special drum design features perforations on the outside and asymmetrical paddles on the inside for faster, more intensive water penetration. The result: less water and detergent are required. The uniquely designed paddles are softly rounded on one side for a gentler action and angled on the other for a more aggressive wash.

**No more leaking pipes**  
The water pipes on our top loader have been integrated into the rigid plastic hydraulic block at the back of the appliance. This eliminates the need for rubber hoses and tubes which have a tendency to leak.

Fuzzy Logic technology monitors the programme cycle throughout and adjusts the wash time according to the size and type of load. For instance, a 2.5kg load of normally absorbent fabrics will take less time than a full 4.5kg load of highly absorbent fabrics. It also guarantees a minimum rinse time of 5 minutes for each rinse, usually 3 rinses per rinse cycle.

**User-friendly operation**  
No washing machine could be easier to use: the operating fascia of the new WOP 2407 is clarity itself. All programmes and additional option buttons and dials are clearly marked with their function.

**Generous-sized drum opening**  
The exceptionally large drum opening allows easy loading and unloading.

**Fits into the smallest space**  
This slimline top loader will fit into even the smallest of flats and can be moved about effortlessly on castors and then secured for complete stability.

**Wash Plus system**  
The Wash Plus system brings the equivalent of an A-class wash performance to a wider range of temperatures than ever before. Unlike most washing machines on the market, Bosch machines now deliver the equivalent of an A-class performance not only at 60°C but at 40°C and 90°C as well.

**Express Wash system**  
Clothes tend to be less soiled nowadays, the Express Wash system reduces wash programme times by 30-40%, ideal for medium/lightly soiled clothes. For example, the Easycare 40°C programme is just 47 minutes.

**Time delay**  
This option allows you to programme your washing machine to start between 1 and 19 hours after you set it. So you can time your washing to be ready for when you get home and it won't have been lying damp in the machine all day. It also allows you to make use of cheaper late-night electricity rates.

**Top loading washing machine**

  - Safeguard monitoring system adjusts load distribution and programme settings to protect clothes
  - Quiet noise level

# Tumble dryer solutions

From anti-crease to mixed fabric programmes, Bosch tumble dryers ensure that your laundry is dry, soft and fluffy

## Easy day

### Anti-crease cycle

On all but one of our tumble dryers the programme automatically ends with an anti-crease cycle. The gentle drum action separates and smoothes your drying for 60 minutes to keep it wrinkle-free ensuring an even softer and fluffier feel – so your clothes have fewer creases and you have an easier day.

### Large drum

The large drum capacity makes loading and unloading easier so creasing is reduced to a minimum.

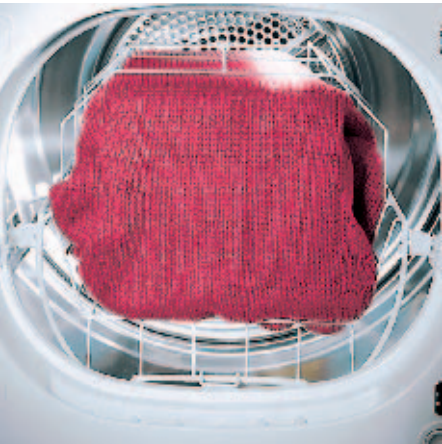

### Reduced ironing

This function reduces “tangling” through its reverse action. The drying time and anti-crease phase are extended to reduce creasing and cut down on ironing time.

# Tumble dryer solutions

## Complete fabricare

**Wool drying basket**  
Now you can dry your delicate woollens without worrying about them shrinking, matting or felting. The ingeniously designed basket holds your woollens in

place throughout the drying process. It is also suitable for a variety of clothes, from sweaters, dresses and trousers to smaller items such as gloves. You can even dry your sports shoes in it.

**Delicate drying**  
Bosch condenser dryers have an innovative low heat feature that automatically reduces the heat in the final stage of drying. The Logixx goes a step further with its super delicate drying feature which reduces the temperature of any programme by 10°C throughout the drying cycle. It also allows for additional fine adjustment of temperature.

**Wide variety of programmes**  
There are up to 15 programmes available, including standard programmes for easy care, cottons and timed programmes. The Logixx also offers an exceptional woollens programme as well as a mixed fabric programme.

**Sensor drying**  
To ensure a dry, soft and fluffy wash across a wide range of fabrics all Bosch condenser dryers feature duo-tronic and fuzzy logic technologies.

Throughout the drying cycle advanced electronic sensors automatically monitor your laundry. By assessing temperature differences, remaining moisture and the drying setting you have selected, they ensure that no energy is wasted on already dry clothes. Meanwhile other sensors constantly monitor the cycle to prevent overheating.

**Low heat**  
This option protects temperature-sensitive textiles by reducing the temperature and lengthening the drying time.

## Free time

**LC Display**  
The liquid crystal display, available on the Logixx model, keeps you in touch with the progress of your laundry. Select the start time and you will know precisely when your clothes will be ready. It also gives you the freedom to select additional options to enhance the drying process.

**Warning indicators**  
You don't even have to check the fluff filter or condenser water container. An LED on the fascia panel will remind you when it's time to empty them.

**Start time pre-selection**  
On the Logixx model you can delay the start of drying from between 0.5 to 19 hours to a time that suits you – or to take advantage of lower rate electricity tariffs.

**Simple one-dial operation / Programme progress indicator**  
Bosch condenser dryers could not be simpler to operate. The one-dial selector and easily readable text and symbols together with programme progress indicators mean you always know what's happening.

Not every feature detailed on these pages are available on every product in this brochure. Please refer to individual product pages and product information tables for precise specifications.

Condenser dryers - *Classixx*

# Washer dryer solutions

For the best of both worlds, Bosch washer dryers offer the ultimate in washing and drying technology

## Sure clean

**Eco**  
The Eco option featured on our Classixx models gives you water savings of up to 20% and a 10% reduction in time. Ideal for lightly soiled loads and where time is of the essence.

## Free time

**Space saving**  
If you want a washer and dryer but you're short of space, this is the perfect solution. With the non-stop programme, our washer dryer can launder a half load of easy-care fabrics in one hour.

**One main programme selector**  
The single selector dial featured on our Classixx and Exxcel models is very easy to use and selects your wash programme, temperature and one of two drying programmes.

## Complete fabricare

**Turbo Action drying system**  
Turbo condenser steam-free drying, means that you have the freedom to install this machine anywhere you like. Exhaust outlets are not required as damp air is condensed, not discharged into the atmosphere.

**Spin reduction**  
The spin speed reduction button, featured on our Classixx models, reduces the spin speed to 600rpm, ideal for more delicate items. Our Exxcel models offer variable spin speeds selected through the LC display in 100rpm steps.

**LC display**  
Shows the wash progress via simple symbols, time remaining and the spin speed.

**Detergent overdose detection**  
The over dosage indicator takes the guess work out of detergent dosage; saving on detergent and water wastage which is better for you and the environment.

**Wash Plus system**  
The Wash Plus system brings the equivalent of an A-class wash performance to a wider range of temperatures than ever before. Unlike most washing machines on the market, Bosch machines now deliver the equivalent of an A-class performance not only at 60°C but at 40°C and 90°C as well.

**Express Wash system**  
Clothes tend to be less soiled nowadays, the Express Wash system reduces wash programme times by 30-40%, ideal for medium/lightly soiled clothes. For example, the Easycare 40°C programme is just 47 minutes.

**Mixed load programme**  
A fast wash for loads where mixed fabrics can be washed safely at 30 degrees in just 35 minutes. Capable of washing up to 2.5kg, it is ideal for loads that might be urgently required before a full load has been collected.

**Drying**  
There is the option to dry your load at one of two levels normal, or gentle, for more delicate fabrics.

**Child lock**  
The child lock gives you peace of mind and stops little fingers from causing havoc.

# Complete ironing solutions

As the home laundry specialists we offer an extensive range of irons designed to tackle the chore of ironing with the minimum of fuss.

## Banish those wash day blues

From our value models right up to our power steam range our irons will help you glide through those piles of washing with the maximum of ease. For a brochure on our complete iron range and other small appliances please contact our brochure line on 0870 7270 446.

## Steam action

All our irons provide high steam outputs and a range of useful functions, such as water spray, shot of steam, vertical steam and variable steam control which can cope with anything from removing creases to freshening up hanging items such as jackets and curtains, to setting pleats.

## Soleplates

All our irons feature high quality soleplates, whether stainless steel, Inox Glisseé (specially treated stainless steel), Granite Glisseé or Cera Glisseé (enamel), they all guarantee a super smooth finish. All of our soleplates feature a large number of steam vents for the widest possible steam distribution and the easiest ironing.

## "Anti-calc" anti-limescale system

This innovative system automatically prevents the build-up of limescale thereby increasing the lifetime of your iron. You can use water straight from the tap and there are no cartridges for you to replace.

## Drip-stop system

This feature avoids accidental dripping of water and potential staining of clothes by automatically shutting off the supply to the soleplate until the iron is hot enough to produce steam.

## Super-fast ironing

Nothing reduces the chore of ironing like the new Bosch power steam irons. With their motorised injection pump systems providing an increased continuous steam output, it can reduce your ironing time considerably – leaving you more free time to relax.

## Pick a colour

Our new top of the range power steam range comes in a choice of fresh new colours for you to choose from.

## A new concept in ironing

Our new power steam irons take the chore out of ironing. With up to 2500W of power, high variable steam outputs and powerful shot of steam, as well as sensor drip-stop, anti-calc and a three way auto shut-off feature, these irons represent a new generation in steam.
